Revision History

Version	Date of Revision	Description of Change	Reason for Change	Affected Sections	Approved By
1.0.1	30-03-2026	UI Change	UI Change , Added Feedback section	All	

1. Introduction

This user manual provides detailed guidance on using the Ticket Management Tool. The application enables users to raise, track, and monitor CCTNS service – related issues efficiently through a structured ticketing process.

2. Purpose of the Tool

The Ticket Management Tool is designed to:

- Log user-reported issues in a standardized format
- Facilitate communication between users and administrators
- Track ticket status from creation to closure
- Maintain records for audit and reference purposes

3. Intended Users

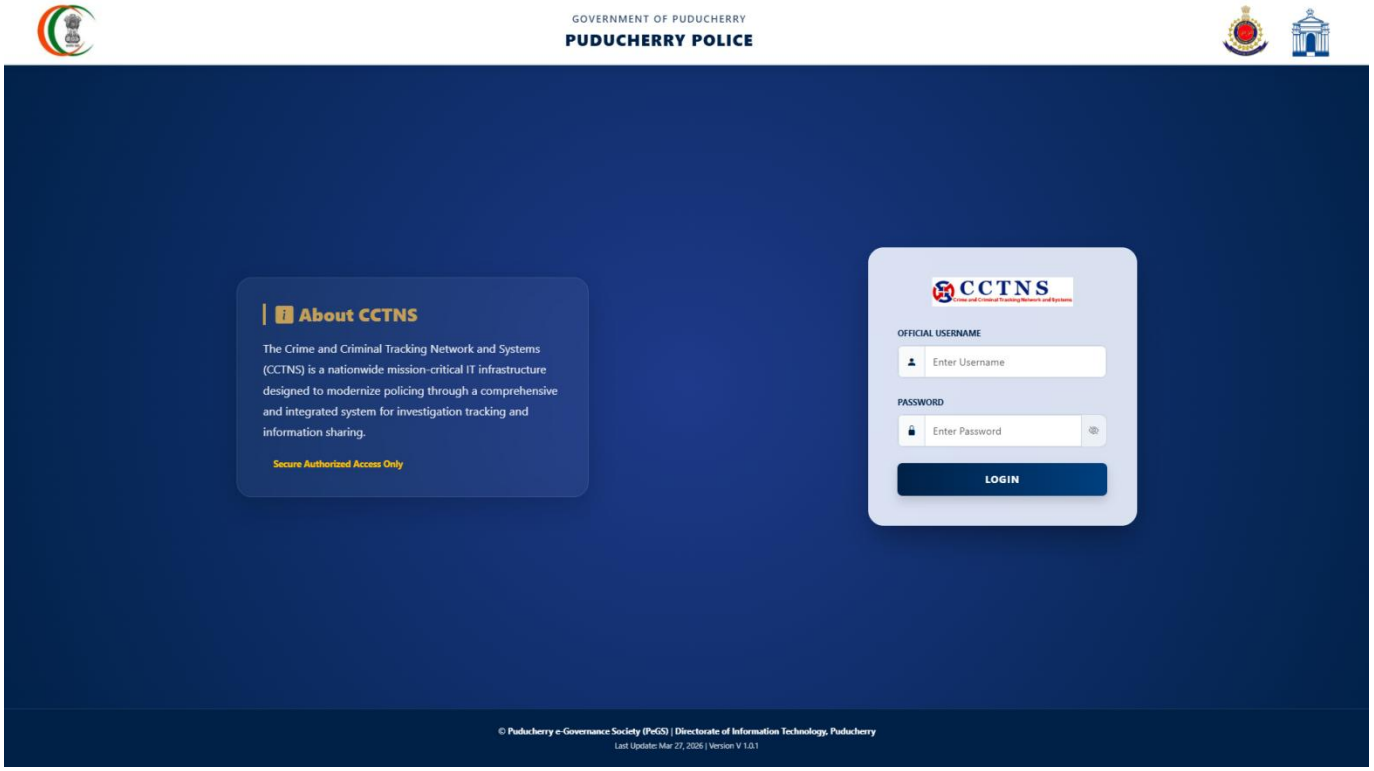
- End Users: **Police Station Users**

4. Access Ticket Management Tool Application

- To access the Ticket Management Tool application, open the following URL in any standard web browser (Mozilla Firefox, Google Chrome, etc.):

  https://omservices-pegs.py.gov.in/tickets

- Upon accessing the link, the **login page** will be displayed as shown below



i. Steps to login

ii. Enter your **Username** and **password** which was given by the CCTNS- PeGS team.

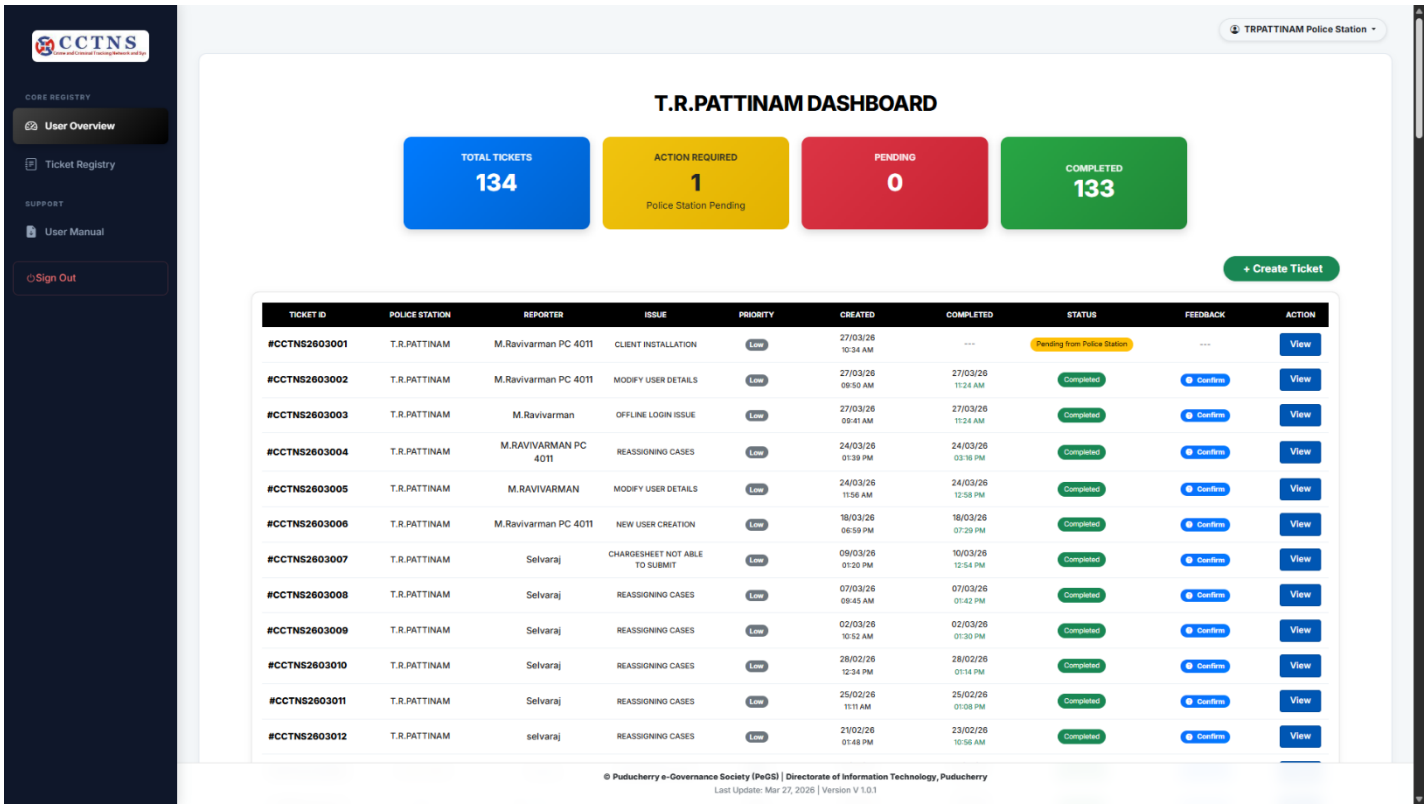
iii. Click on the login button

iv. Upon successful authentication, the system redirects to the **User Dashboard**

5. User Dashboard Overview

The User Dashboard is the landing page after successful login. It provides a real time summary of all tickets raised by the user and allows quick access to tickets details and actions.

5.1. Dashboard Components



The dashboard screen contains the following key sections:

a) Summary Tiles

- **Total Tickets:** Displays the total number of tickets raised by the user
- **Pending:** Shows tickets that are awaiting action with CCTNS Support team
- **Pending from Police Station**: Shows tickets that are currently awaiting action or additional documentation from the **Police Station**.
- **Completed:** Displays tickets that have been resolved and closed by the CCTNS Support team

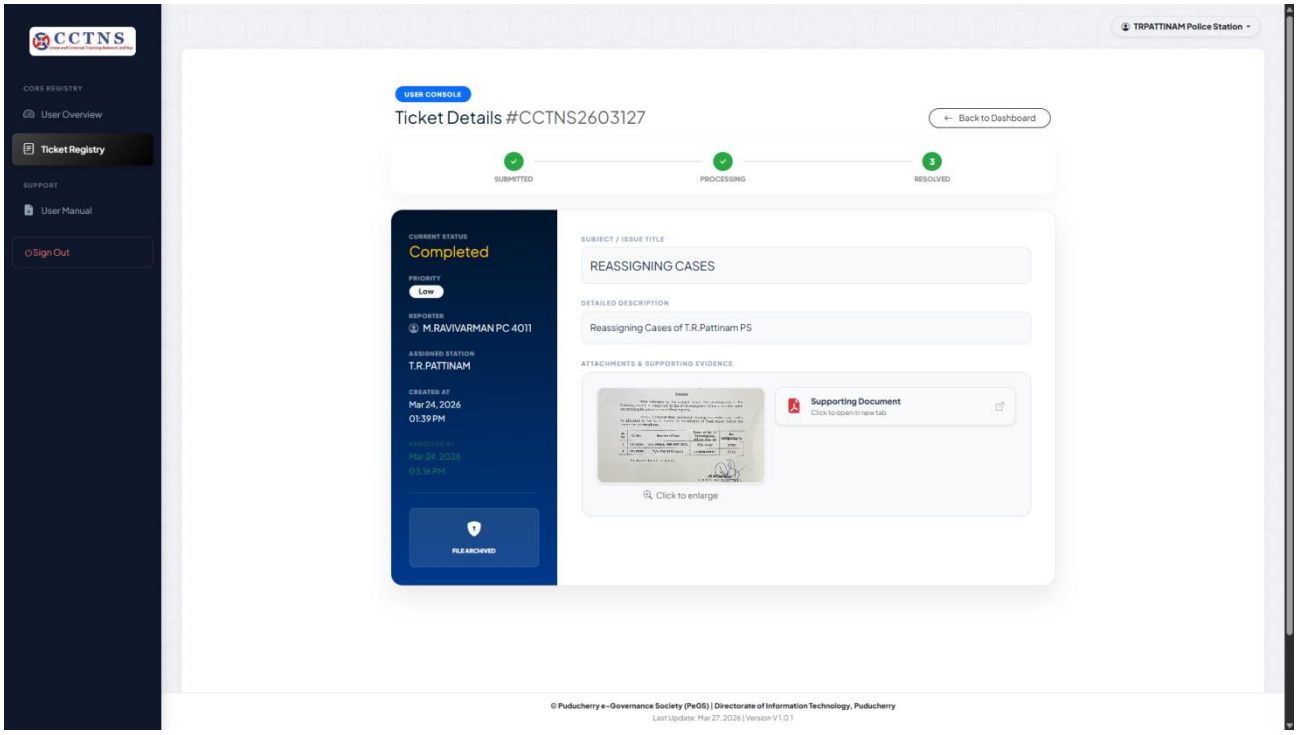
b) **Ticket List** - The central section of the dashboard displays a tabular list of tickets with detailed information.

c) Navigation Menu

- User Dashboard: Returns to the main dashboard view
- Tickets: User to create and view tickets
- Logout: Safely exits the application

To raise a new ticket, click on the **Ticket** option available on the dashboard.

5.2. Ticket List Columns Description



Feature	Description
Ticket Header	Displays the unique system-generated Ticket ID (e.g., #CCTNS2603127) and the "User Console" badge to identify the access level.
Status Stepper	A high-readability progress tracker indicating the current lifecycle stage: Submitted, Processing, and Resolved.
Identity Sidebar	Provides immediate visibility into the current Status (Completed/Pending), Priority level, Reporter Name, and the Assigned Police Station.
Timeline Audit	Records exact timestamps for when the request was Created At and Resolved At to maintain an official documentation trail.
Issue Context	Contains the comprehensive Subject/Issue Title and a Detailed Description narrative provided by the user.
Evidence Section	A dedicated area for Attachments & Supporting Evidence, allowing users to view screenshots and click to open supporting PDF documents in a new tab.
Admin Remarks	For active or rejected cases, this section displays official feedback from the support team, such as rejection reasons or requests for revised images.
File Archiving	Once a ticket is finalized, a secure "File Archived" badge appears, indicating the record is locked for official oversight.

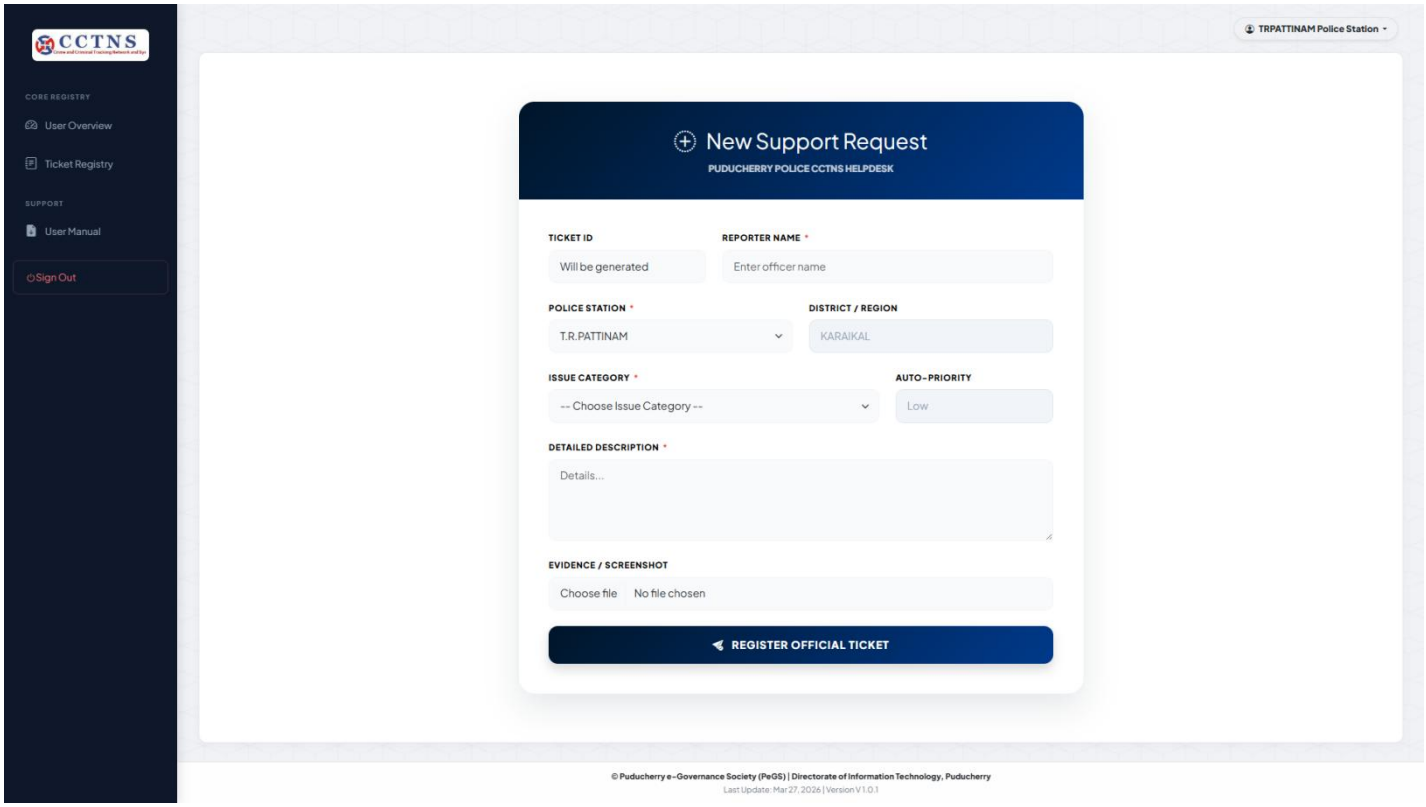
By clicking the **View** button, users can access a comprehensive ticket record featuring a visual status stepper and detailed evidence. **Completed** tickets are clearly distinguished by a

professional green status label and a **"File Archived"** security badge.

6. Create New Ticket

6.1. Navigation

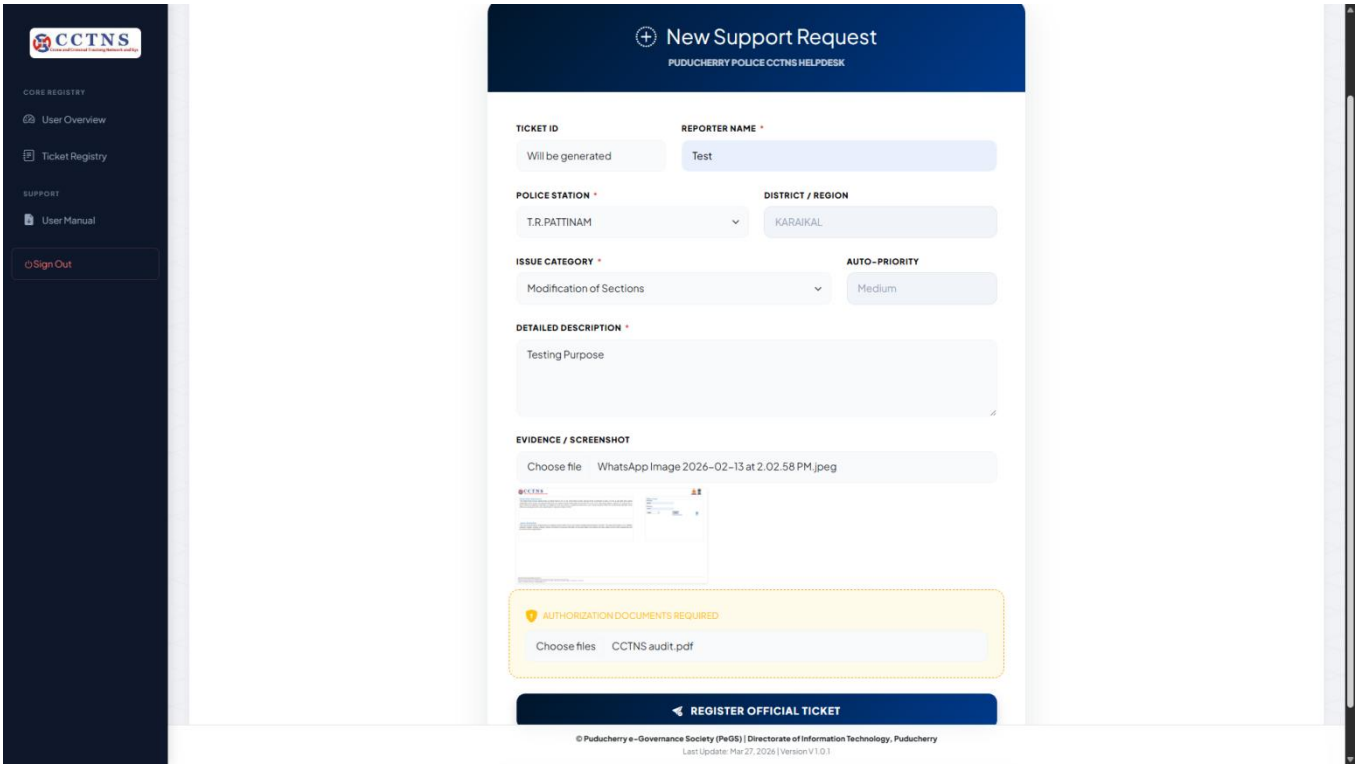
From the User Dashboard, Click **Create New Ticket**. The system opens the ***Create a New Ticket screen.***



6.2. Create New Ticket Screen Overview

This screen allows users to submit a new CCTNS related issue. Fields market with an asterisk (*) are mandatory.

6.3. Ticket Fields Description



Field Name	Type	Description
Ticket ID	Auto- Generated	System-generated after successful submission
Reporter Name *	Text Field	Name of the user raising the ticket
Police Station *	Dropdown	Select the relevant police station
Region *	Dropdown	Select the applicable region (e.g., Puducherry)
Issue *	Dropdown	Select the issue category (e.g., Reassigning Cases)
Description *	Text Area	Brief explanation of the issue (Maximum 250 characters)
Priority	Auto / Dropdown	Indicates urgency of the ticket (Low / Medium / High). Default value may be system-assigned
Upload Screenshot (Optional)	File Upload	Upload screenshots for reference (Supported formats: JPG, PNG; Max size: 5 MB)
Approval Documents *	File Upload	Upload approval or supporting documents (PDF / Image). Mandatory for certain issue types

Note: Screenshots help the support team understand the issue visually. Approval documents are mandatory

6.4. Submission Guidelines

- Ensure all mandatory fields marked with (*) are filled.
- Description must not exceed **250 characters**.
- Upload screenshots only in supported formats (JPG / PNG) with a maximum size of **5 MB**.
- Approval documents must be attached wherever required.
- Review the uploaded files before submission.

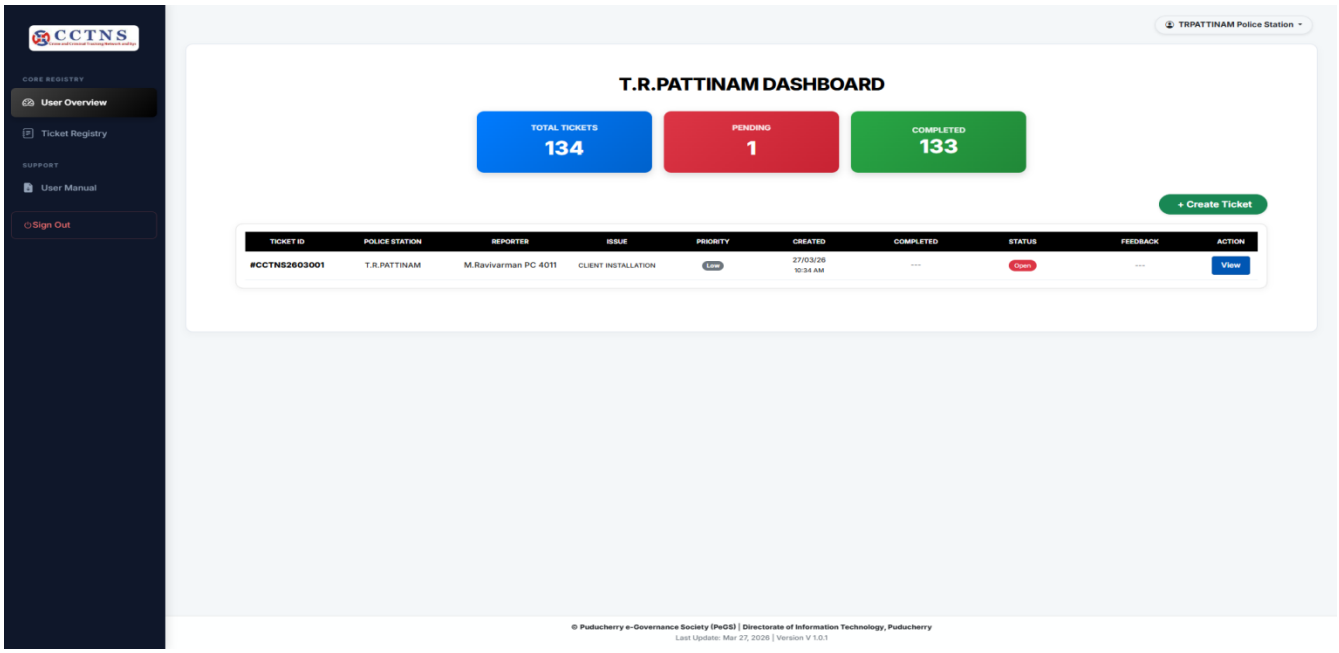
6.5. Submit Ticket

i. Review the entered information

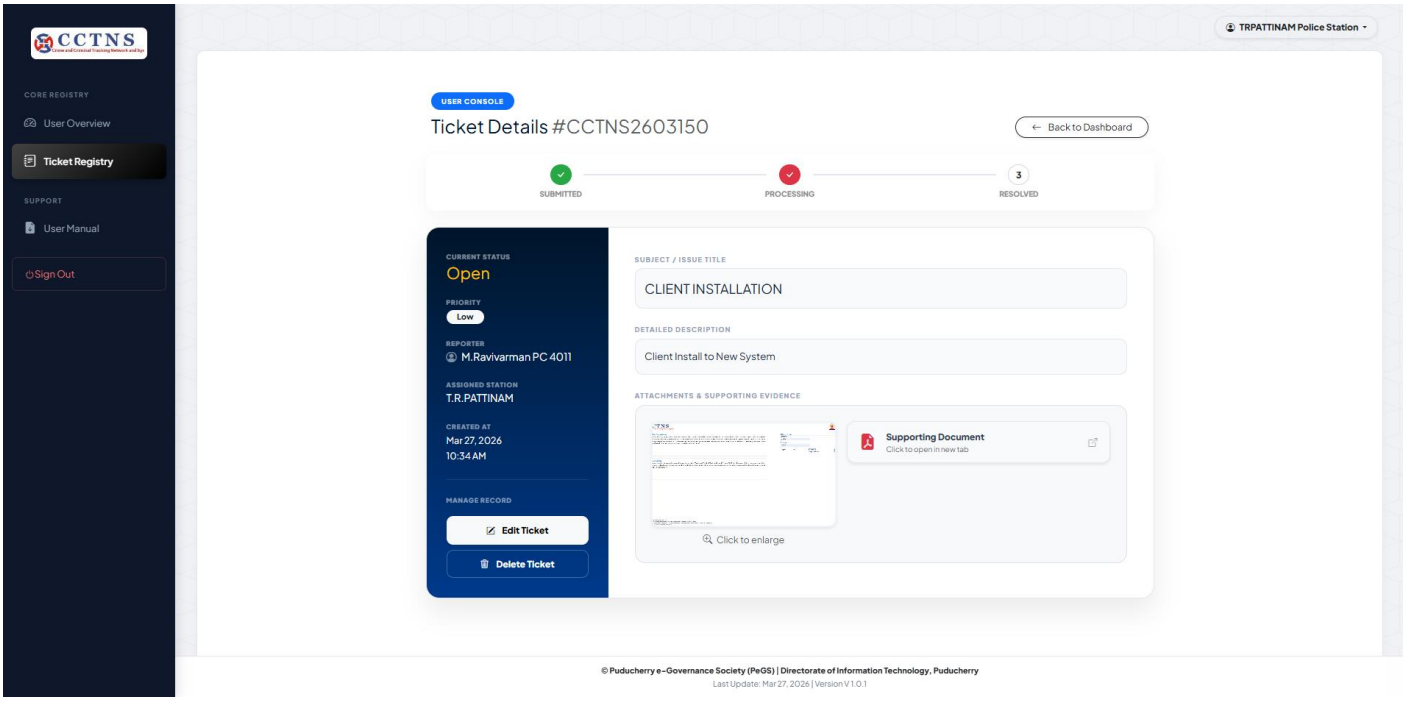
ii. Click the Submit Button

iii. A Ticket ID is generated automatically

iv. The system redirects the user to the Dashboard, where the newly created ticket appears with its status.



7. Viewing Ticket Status



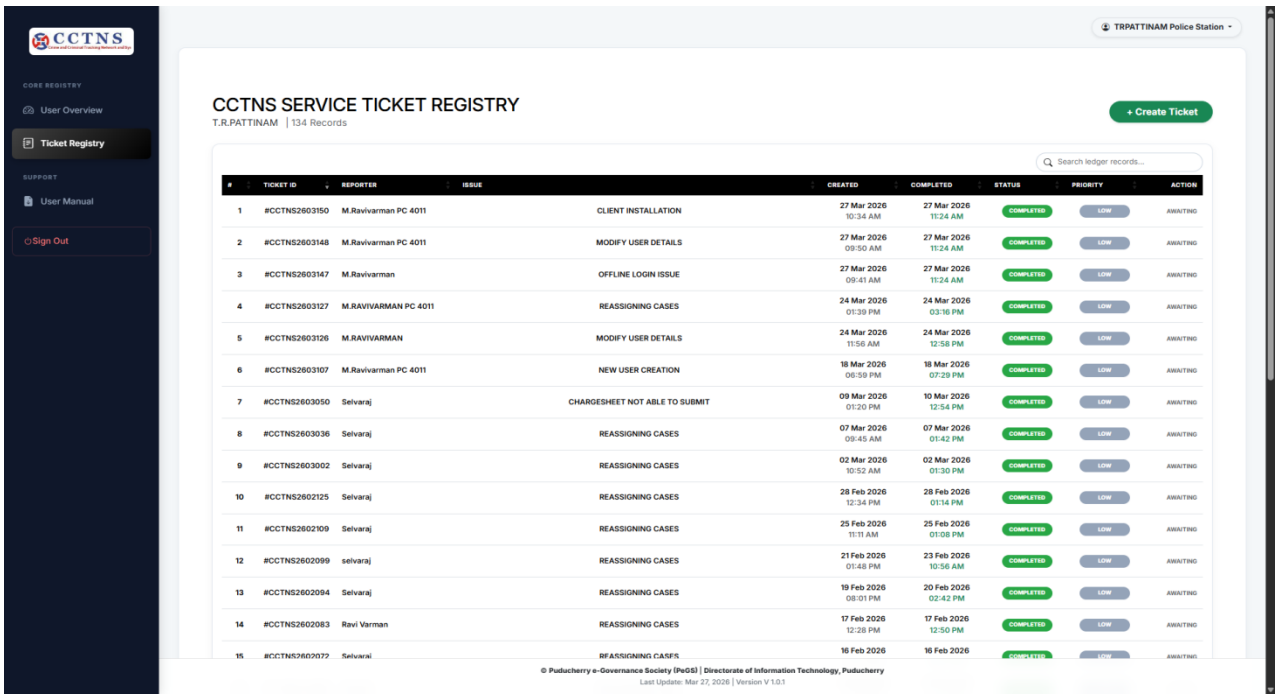
i. Locate the **Edit Ticket** and **Delete Ticket** buttons within the interface to manage your requests.

- Users may utilize the **Edit** feature to correct typographical errors or append additional information to a request after it has been submitted.
- Conversely, the **Delete** option allows for the removal of redundant or incorrectly raised tickets
- Users may utilize the **Delete** function to remove duplicate tickets caused by network submission errors. Removing these extra entries helps streamline the ticketing process and improves response times.

7.1. All Submitted Tickets Screen

The **All Submitted Tickets** screen displays a consolidated list of all tickets raised by the user. This screen helps users track the progress and current status of each ticket.

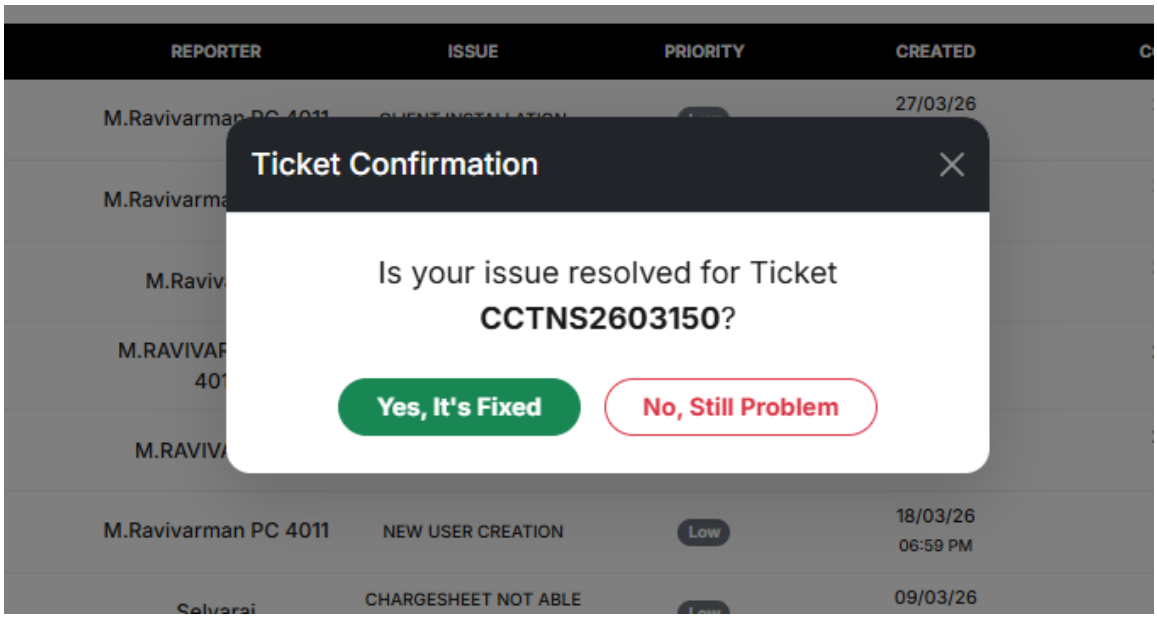
i. Click **Ticket Registry** to view ticket details and PDF



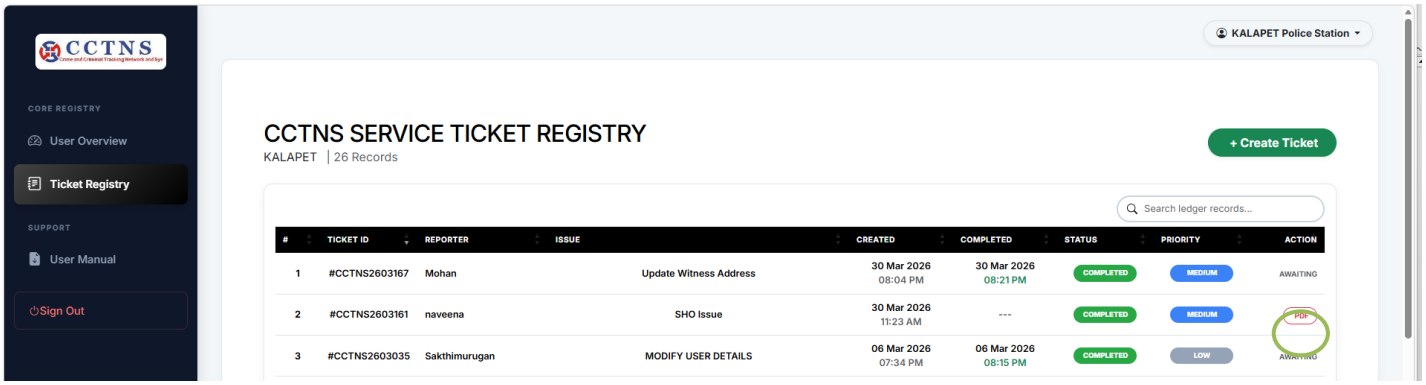
8. Feedback

For the O&M (Operations & Maintenance) Team documentation, here are the two simple lines for that confirmation process:

- **Confirmation of Resolution**: Clicking yes formally confirms the ticket is resolved and sends positive feedback to the O&M team to close the record.
- **Rejection with Remarks:** Clicking No allows the user to submit a specific remark or opinion explaining why the update is incomplete or what remains to be fixed.



9. View Action Taken PDF



- Navigate to the **Ticket Registry** page to review your submitted requests.
- Within the **Action** column, users can access the **PDF** button for tickets with a **'Completed'** status. Clicking this will allow you to view or download the detailed action report provided by the **CCTNS O&M Team**

10. Best Practices

- Always select the correct Police Station and Region.
- Provide a clear and concise issue description.
- Attach relevant screenshots or approval documents wherever applicable.
- Regularly monitor the dashboard for ticket updates.

11. Security & Access Control

- User credentials are confidential and must not be shared.
- Unauthorized access or misuse of the system is prohibited.

12. Support & Contact

For technical assistance or system-related queries, contact the designated system administrator or support team.
