Issue Summary:

- **Problem:** Missing person form could not be submitted.
- **Possible Causes:**
    1. Some mandatory (monitory/required) fields are missing.
    2. Network or connectivity issue (HTTPS connectivity failure).

Action Steps:

1. **Verify Mandatory Fields:**
    - Check that all required fields (e.g., name, age, gender, contact details, location, date/time last seen, reporter details, etc.) are filled in correctly.
    - Ensure no mandatory field is left blank or incorrectly formatted.
2. **Validate Form Data:**
    - Review each section of the missing person form for completeness.
    - Confirm that any attachments (e.g., photo, ID proof) are uploaded correctly.
3. **Check HTTPS Connectivity:**
    - Confirm that the system or browser is connected to a stable and secure internet network.
    - Verify that the website or application URL starts with `https://`.
    - Check if the SSL certificate is valid and not expired.
    - Try reloading or submitting the form again after confirming connectivity.
4. **System/Server Check:**
    - If the issue persists, verify that the backend service or API handling the form submission is up and running.
    - Report any downtime to the technical team if needed.
5. **Retry Submission:**
    - Once all mandatory fields are completed and network connectivity is stable, reattempt form submission.
