Update Witness Address

Ticket Number	CCTNS 2500104
Date & Time of Call Received	27-05-2025
Name Of Police station	Nedungadu
Caller Name	Indira
Issue	Update Witness address
Name of the Help Desk Resource	Pushparaj
Status	Completed
Resolution , Date and Time	27-05-2025

Update Witness Address in Local DB

1. Open SQL Server Management Studio (SSMS)

- Connect to the **local database server** where the FIR and person address tables are stored.

---

2. Verify the FIR Witness Information

- Run the following query to check the witness entry for the given FIR number:

```
SELECT *
FROM t_fir_witness_info
WHERE FIR_REG_NUM = 26002025250095;
```

- This confirms the witness details linked to the FIR.

---

3. Check the Person Address Details

- Execute the query to view the current address for the given PERSON_CODE:

```
SELECT *
FROM t_person_address
WHERE PERSON_CODE = 9222600203600215845;
```

- This ensures you are updating the correct person's address.

---

4. Execute the Update Query

- Run the update statement to modify the witness address:

```
UPDATE t_person_address
```

```
SET ADDRESS_LINE_3 = 'karaikal'
WHERE ADDRESS_CD = 9222600203600215845;
```

- This updates the **ADDRESS_LINE_3** field to **‘karaikal’**.

---

5. Confirm the Update

- Re-run the SELECT query to verify that the address was updated:

```
SELECT *
FROM t_person_address
WHERE PERSON_CODE = 9222600203600215845;
```

- Check that **ADDRESS_LINE_3** now shows the updated value.

---

6. Verify Another Witness Address (If Required)

- Run the following query for validation on another PERSON_CODE:

```
SELECT *
FROM t_person_address
WHERE PERSON_CODE = 92216002028000270;
```

- This step confirms any additional witness address verification.

---

7. Completion

- You have successfully updated the witness address in the local database.
- Status: **Witness address update executed successfully.**
