---

❖ **Open the Database**
In **SQL Server Management Studio (SSMS)**, expand the **Databases** section in the Object Explorer.
Click on the database named:
**`cctns_state_db`**

---

❖ **Navigate to Stored Procedures**
Inside the `cctns_state_db`, expand the **Programmability** folder.
Under that, click on **Stored Procedures**.

---

❖ **Apply a Filter to Find Reassignment Procedure**
Right-click on **Stored Procedures** and select **Filter > Filter Settings**.
In the filter box:

- Under **Name contains**, type:
  `reassign`
- Click **OK** to apply the filter.

---

❖ **Locate and Open the Required Procedure**
In the filtered list of stored procedures, look for:
**`INSERT_REASSIGN_IO_MANUAL`**
Click on the procedure name to open its execution window.

---

❖ **Enter Required Details**
Enter the following information:

- **FIR Number**
- **New IO Number**
- **Date**

- **Time**
- **Details/Remarks** (e.g., *"IO changed"*).

---

❖ **Execute the Procedure**
After filling in all the required fields, click **OK** to run the procedure.

---

❖ **Check the Return Value**
After execution, confirm that the **Return Value** is:
✅0 — indicating **successful execution**.

---

❖ ✅**The IO reassignment has been completed successfully.**
