ZERO FIR DELETION

Ticket Number	CCTNS 2500053
Date & Time of Call Received	05-03-2025
Name Of Police station	Traffic North
Caller Name	Jayasree
Issue	Zero FIR deletion
Name of the Help Desk Resource	Prabhulingam
Status	Completed
Resolution , Date and Time	05-03-2025

1. Access the Database Server

- Open **SQL Server Management Studio (SSMS)** and connect to the **Database Server**.

---

2. Navigate to Stored Procedures

- In the **Object Explorer**, expand the database you're working with.
- Expand the **Programmability** folder.
- Expand the **Stored Procedures** section.

---

3. Apply Filter to Find the Procedure

- Right-click on **Stored Procedures** and select **Filter > Filter Settings**.
- In the filter box, enter the procedure name:
  `UDP_DELETE_FIR`
- Click **OK**.

---

4. View and Edit the Procedure

- Locate **UDP_DELETE_FIR** in the list.
- Right-click the procedure and select **Script Stored Procedure as > ALTER To > New Query Editor Window**.

---

5. Run Preliminary Queries

- Execute the following SQL queries to retrieve necessary FIR data:
- `SELECT * FROM m_police_station WHERE PS_CD = 26002012;`

- `SELECT * FROM t_fir_registration`

- `WHERE PS_CD = 26002012 AND REG_YEAR = 2025`
- `ORDER BY FIR_SRNO DESC;`
- **Note down the following parameters** from the result:
  - `FIR_REG_NUM`
  - `PS_CD`
  - `REG_DT`

---

6. Locate the Main Deletion Procedure

- Again, right-click on **Stored Procedures > Filter Settings**.
- Enter the procedure name:
  `DELETE_COMPLETE_FIR`

---

7. Execute the Deletion Procedure

- Locate and select:
  `[dbo].[UDP_DELETE_COMPLETE_FIR]`
- Right-click on it and choose **Execute Stored Procedure**.
- In the popup window:
  - Enter the previously copied **FIR_REG_NUM** in the **Value** column.
  - Enter the string `"complete_delete"` in the respective parameter field.
- Click **OK** to execute.

---

8. Confirm Deletion

- Run the following query to verify if the FIR has been deleted:
- `SELECT * FROM t_fir_registration`
- `WHERE PS_CD = 26001006 AND REG_YEAR = 2025;`
- Identify and note the **FIR Registration Number** from the result.

---

9. Connect to the Application Server

- Change the connection from the **Database Server** to the **Application Server**.
- Verify the **IP address** of the Application Server.
- Connect to the corresponding **Police Station** based on the PS_CD.

---

10. Re-run the FIR Verification Query

- Execute:
- `SELECT * FROM t_fir_registration`
- `WHERE PS_CD = 26002012 AND REG_YEAR = 2025`

- `ORDER BY FIR_SRNO DESC;`

---

11. Call the Stored Procedure via Object Explorer

- In **Object Explorer**, go to **Stored Procedures**.
- Right-click on `UDP_DELETE_COMPLETE_FIR` and choose **Call Code** or **Modify** to view/edit the logic.

---

12. Update FIR Sequence Number

- Open a **New Query Editor Window**.
- Execute:
- `SELECT * FROM m_registration_Seq_num;`
- In the result set, **decrement the FIR number by 1** for the respective police station.

□ Final Confirmation

- The **Zero FIR deletion** process has been executed **successfully**.
